EXPERIENCE

Start Studio

Full-Stack Developer

Spanish Fork, UT (Remote)

November 2022 – Present

- Build out robust single-page and server-rendered web frontends using React and Next.js
- Build extensive backend codebases and APIs using Django, Docker, and PostgreSQL
- Seamlessly integrate applications with first- and third-party APIs, managing state and data updates effectively
- Work with clients and designers to implement complex Figma designs with exacting precision
- Respond to time-sensitive outages or errors efficiently, minimizing downtime and data losses
- Ensure client satisfaction by quickly handling requests for changes or feature adjustments

EDUCATION

Mountainland Technical College

Web Programming and Development

Lehi, UT

January 2022 – January 2023

- Developed highly interactive web applications utilizing TypeScript frameworks such as React and Angular
- Wrote modular server- and client-side code using libraries in Node.js like Express and Socket.io
- Wired up applications to effectively communicate with databases using standardized REST protocols

PROJECTS

Personal Website

Next.js, Drizzle, TailwindCSS, Postgres, DigitalOcean

<https://talmage.dev/>

March 2025 – Present

- Develop personal website with Node.js and TailwindCSS emphasizing responsive and accessible design
- Employ Drizzle ORM using PostgreSQL to store form submissions, projects, skills, and project case studies
- Build extensive authenticated admin panel for managing website content without needing to redeploy website
- Manage deployments and maintain consistent uptime for accessibility and reliability

Pixel Valley Supply

React, Django, Stripe, DigitalOcean

<https://pixelvalleysupply.com/>

December 2024 – Present

- Design and develop full-stack apparel e-commerce web application using React, Django, and PostgreSQL
- Seamlessly wire up Printify API (Print-On-Demand provider) for autonomous order fulfillment
- Maintain a custom secure Stripe checkout for individualized shipping costs, making heavy use of Stripe APIs
- Implement optimized product processing using Celery and Redis for background task management
- Deploy application on DigitalOcean with Docker in a horizontal infrastructure to maintain scalability
- Implement Google Analytics and Meta Pixel tracking for cohesive user analytics and ad performance

Art Portfolio

React, Django, Stripe, DigitalOcean

<https://stephaniebergeson.art/>

November 2024 – January 2025

- Design and develop full-stack art portfolio/e-commerce application using React, Django, and PostgreSQL
- Employ robust CI/CD operations for a straightforward and maintainable deployment strategy
- Integrate Stripe Checkout and Stripe webhooks, ensuring effective order tracking and fulfillment notifications

SKILLS

- Proficient in React, Django, Next.js, TailwindCSS, SCSS, TypeScript, JavaScript, Python
- Proficient with Docker, Redis, Celery, PostgreSQL, DigitalOcean, and managing vital deployments using scripting and database backups
- Skilled in SEO optimization and integrating analytics/tracking with Google Analytics and Meta Pixel Tracking
